

Title of the talk:

Codes and Biology: A Second Emerging Bridge

Speaker:

Manish K Gupta, PhD IIT Kanpur

Department of Computer Science and Engineering

Arizona State University

Email: mankg@computer.org

Abstract:

Coding theory is well known for its applications to communications and computers. In recent years a new paradigm of digital biology is emerging. Several researchers have identified at least three important connections between biology and coding theory. In this talk we will look at one such emerging link between coding theory and biology.

Time: 3:30 pm

Date: September 25, 2003

Place: San Diego, California
